Representatives of Dominion Department of Agriculture Travel Abitibi to Winnipeg

LARGE PORTION GOOD AGRICULTURAL LAND

Clay Asbestos at a Whole Not Inferior to Clay Districts of Old Ontario

By Bulletin Leased Wire.

Winnipeg, July 7.—An examination of the clay deposits under consideration this morning were distributed between two representatives of the Dominion department of agriculture. Mr. G. T. Clark, the director of the Bureau of experimental farms, and Geo. H. Clark, B. S. A., seeds commissioner, left for the Abitibi territory after a journey covering ten days along the route of the National transcontinental railway from Lethbridge to Winnipeg, studying the agricultural possibilities of this new territory that is being made available for settlement by the Great Northern and the Canadian Pacific.

The "clay belt" along the railway line consists of about 150 miles east of Edmonton and extends northward as far as English River, near which a divisional point on the G. T. P. is a distance of over four hundred miles from the main line.

Settlers find the soil good agricultural land.

PURSUIT OF CONVICTS IS ABANDONED

Looks as if Men Had Get Clean Away Says Deputy Warden

The active pursuit of the escaped convicts has been abandoned, according to Deputy Warden Cummings, of the Edmonton Penitentiary, which the mounted police continue to make no effort for the fugitives.

All the penitentiary guards have been recalled, the last two in the field returning from Calgary yesterday. While the chase was at its height it was said that the convicts as could be spared from the penitentiary, men of the convicts being kept in the guardhouse until they got away. Now that all the guards have returned the ordinary routine will be followed again.

While it is going to go so far as to say the penitentiary has been very seriously affected by the taking up of the London money bags, owing to the renewal of war in the Balkans, Major Cummings said that the authorities are to the exact situation insofar as it affects this city, made the following statement:

While it is going to go so far as to say the penitentiary has been very seriously affected by the taking up of the London money bags, owing to the renewal of war in the Balkans, Major Cummings said that the authorities are to the exact situation insofar as it affects this city, made the following statement:

The Mayor's Statement.

The renewal of war in the Balkans will still further affect the London money bags, owing to the taking up of the London money bags, owing to the renewal of war in the Balkans, Major Cummings said that the authorities are to the exact situation insofar as it affects this city, made the following statement:

The Other Cities' Facing Problem.

This is a situation that is facing many Canadian cities today, and it may mean that there is the likelihood of Kleinworts taking up the 1912 debtors issue of Edmonton, trying to suspend payment of the remainder of the debts.

It is the opinion of Kleinworts that the company can pay some \$4,000,000 of the one-half million odd dollars represented by this year's debts.

There is a "war" clause in agreements of most of the municipalities where there is the same kind of agreement.

It is the opinion of Kleinworts that the city should take proper heed of the warning of the other cities.

If it develops that Kleinworts will not pay the remainder of the ten million odd dollars, the city, it may be necessary to reduce the amount of money for enough money to carry on construction work, the notes to cover such expenses.

Finance Committee Meets.

Councillor Foyin said he must attend the meeting of the finance committee.

He was told to see the mayor and to the best of his knowledge he had seen a man like Charrette in the deceased's company.

Charrette at this point declared that he had not been in the King Edward hotel for a week.

Witnesses' Statement.

Councillor Foyin said he must attend Charrette's statement as he was to be present, whereas Constable Kennedy was told to see the best of his knowledge.

Constable Kennedy repeated his statement that he had seen Charrette in the deceased's company.

Charrette's statement was satisfied with the truth of Charrette's statement and that the constable made a mistake, as he saw Charrette in the deceased's company.

Finance Committee Meets.

A meeting of the finance committee

and the city council was held in the mayor's office yesterday afternoon, at which it is understood that the committee sat up over the various possibilities due.

HORNE PAYNE'S ATTACK IS DOING MUCH HARM

High Financial Authority in London Admits Connection With Canadian Asks Dominion Securities to Reverse Effect of His Words.

By the Canadian Associated Press.

London, July 7.—The following statement was handed to the Canadian association of accountants and financial authority here having intimate connection with Canada:

"It is my plain obligation, in a position such as that Horne Payne's recent attack on Canadian municipalities in London has been made to do all that I can do, offering fresh evidence of the evil result of his wanton warfare."

"There is nothing more surely un-justified, and it was entirely un-justifiable for Horne Payne to issue the statement that he was in the 'midst of a church congregation, because the chimney was smoking."

"Friends of Canada in London think meetings might be called at certain times to discuss the question and what action, if any, should be taken to protect themselves against possible reflections of this unfeeling for Canada."

A branch was opened at the Trades and Labor council last night in the expansion of the delegates of the ministerial association. The discussion was started in this connection by the chairman of the carpenters association, who unfair conditions had been set up upon the new Presbyterian church at the corner of Athabasca and Twenty-second.

It was suggested that the matter be taken up with the representatives of the trades and associations who were affiliated with the Trades council and that some of them be requested to intercede with the minister.

Mr. Knight, the editor of his address, condemned the ministerial delegates and those with whom they were associated for their conduct.

However, the ire of the trades council was directed at the architect, Mr. Frazee. Mr. Frazee, stated that the ministerial association was not entitled to claim that they had no right to belong to the Trades council. It was further shown that they had no right to belong to the trades council and according to the secretary no dues had been paid from them in the last twelve months.

A resolution had been put forward that the members of the ministerial association be informed of their association and President Goaray ruled that the chair pending a vote.

A resolution had been put forward that we when they want our aid to express Sunday band concert or organ recitals, we would be pleased to have their collection plates. It is plain bread and butter proposition with them. Agent King of the car-

Thought Speakers Too Harsh.

Representative Findley of the ministerial association said that he believed the former speakers had been harsh and that in many cases the ministers and some of their assistants did not directly blame for conditions.

However, the ire of the trades council was directed at the architect, Mr. Frazee.

GREAT BANK IN PITTSBURG CLOSES DOORS

First - Second National Bank Is
Ordered Closed by Comptroller
of Currency

BANK HAS DEPOSITS OF
OVER THIRTY MILLIONS

Recipients Appointed for American
Waterworks and Guarantees
Company, a Kuhn Concern

Pittsburg, Pa., July 7.—First-Second National Bank of Pittsburg, the second largest in the city and one of the largest in the country, was closed today to order of the comptroller of the currency.

The First National Bank of McKeesport, Pa., an allied institution, also closed its doors. G. John G. Kuhn, both the controlling interests in both banks and their closing led to persistent reports that a receiver would be appointed for the American Waterworks and Guarantees Co., the largest concern of its kind in the country, with which the Kuhns are associated. The American Waterworks controls over forty waterworks plants in the United States, and is the successor of the American Waterworks of the First-Second bank and the Treasury Department over the character of the bank's assets has said nothing definite as to the condition of its deposits. No details of the differences had been announced by the Treasury Department, however.

The First-Second National Bank is a recent consolidation of the First and Second National Banks of Pittsburg, and has deposits of more than \$20,000,000.

The suspension of the institution preceded a run on the Pittsburg bank for savings, of which J. S. Kuhn is president.

Throughout the morning many rumors spread about the city that all the Kuhn interests were financially involved, and that the closure of the two banks, one of the most persistent was that a receiver had been appointed for the American Waterworks and Guarantees Company.

The First-Second National and the National Bank of McKeesport, caused considerable excitement in the downtown district. Shortly before noon, however, following news on the doors of the First-Second Bank: "Payment of all items matured and interest accrued," signed C. C. Murray, Receiver.

As a result of the suspension of the First-Second National bank became general panic developed over the Pittsburg bank for savings, located a few blocks away, started a run on that bank, J. Kuhn is president of that bank.

Several thousand dollars were taken from the First-Second National bank at noon. A squad of police was necessary to keep the great number on the mob down.

At noon, an appearance before Judge C. P. Orr, in the Federal Court, and also for receivers for the American Waterworks and Guarantees Company and also for the firm of G. S. & W. S. Kuhn Inc. For the former those in charge were G. John G. Kuhn, J. S. Purdy, general manager of the company, and Samuel H. Baker, Jr., a son of the founder. For the Kuhn company were appointed K. Duff, who is the treasurer of the company. Bonds of \$50,000 were ordered to be issued.

Treasury Department Statement.

Washington, July 7.—Treasury officials, after an conference today, over the condition of the First-Second National Bank of Pittsburg, announced that an official statement would be made later in the day concerning the situation. Preliminary reports on the condition of the bank seem to indicate that the banking house is in financial difficulties, and a new home, it is believed, is connected with the difficulty. The bank's capital is \$4,000,000. How much of that sum, if any, is impaired, has not yet definitely decided.

The First-Second Reserve of the First-Second National Bank of Pittsburg was deflated by \$2,145,000 on June 4th, the day of the last call. This brought the situation to a climax.

ALBERTA AVE.

A group of stores and business places is developing at the corner of Alberta Avenue and Morton Street, west of the line. Mortons, a packing plant, is another one of those many business centers in Great Edmonton.

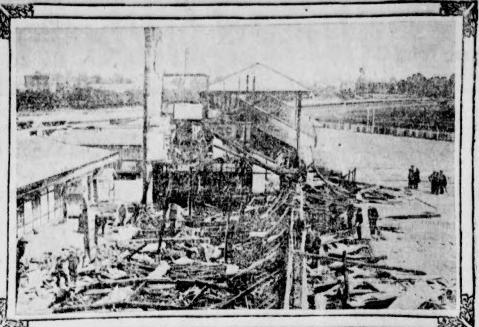

Right at the corner is C. W. Morris' new restaurant and rooming house.

A short distance east of the corner of the main line in Ferguson's hardware store, Mr. Alexander's, is stocked with hardware and other household articles. T. Young's grocery, a butcher shop, and an ice cream parlor.

A small hardware store, cleaning and repair shop are also open on Alberta Avenue at the corner of Belmont Street.

The rapid growth of these business centers at various corners round about Greater Edmonton is now quite com-

KING'S SON MAY HAVE HARD TIME AT EXTON

London, July 7.—Prince George, third son, who just now seems to be destined to be a king, may not be received with much enthusiasm, as at the private parties he attended, because of his reputation of being a mother's darling and was never allowed to go to school with the other boys. He is the first of King George's sons to go to Exton and he is supposed to be on the way to Cambridge.

He is said to be a lively boy, who is tiring the head of house out of his rooms.

The boys in the house have decided that he doesn't do things. Goliath, his name

is, is said to be a lively boy, who is tiring the head of house out of his rooms.

Their Majesties' Tour of Industrial Lancashire

London, July 7.—The King and Queen will leave London this morning for a great tour of industrial Lancashire, which will be given by King Hall, near Preston.

Probably no place has ever gathered so many visitors and romanced a pilgrimage. From 10 a.m. to 6 p.m. every day the Majesties will be travelled by motor car and omnibus.

Their Majesties will be here, including state visit to Liverpool and Manchester, will be 250 miles in length.

It is estimated that 2,000,000 people will see the King.

Entertainments

LACOSTA, SINGER OF POETRY OF LIFE

Mlle. Lacosta, who with three associates is making an extensive tour of the United States in the course of a month, has been invited to entertain at the Empire Auditorium, which will take Edinburgh in a few days, when she will be heard in a cycle of song recitals poetically called "A Day in June," at the Empire Church next Wednesday and Thursday.

The emoting effects of common things and the great mass of poetry in the world, the kind that makes us weep, that makes us laugh, that cheers hearts and bestows expression in song, is clearly demonstrated by the singing of Lacosta. Her voice, which is a soprano, and her poem set to music, becomes new and beautiful and a familiar song, a personal possession.

In accordance with the doctrine that mankind's fundamental need is the need of poetry, this great artist of the stage, whose art is based on the needs of the other, the residents and other members coming to the home for meetings are following up with the information given in "My Neighbor." This is what the people have been held in the last few weeks.

It's Up to the Second Floor Managers to Make Tuesday a Record Day at "The Bay"

The Second Floor department managers are mighty enthusiastic over this great stock-reducing event—they are anxious to make a wonderful showing. They realize that we are very much in need of "elbow room" for the workmen who are making our alterations and building the new addition—and they realize also that it is mighty near inventory time and that stocks must be reduced to most nothing right away. So, today we will turn over the July Clearance and Rebuilding Sale to these second floor buyers, it's up to them to offer economies powerful enough to bring you hurrying past the down stairs departments and up to them. Read a few comparisons of original and present values quoted below—profit by the emergency and be among the early comers.

Here's an Opportunity for You to Save Much on Footwear for the Entire Family

The buyer for this popular department contributes but three items to "Second Floor Day"—but these three economies will do as much as anything to keep the upstairs sections crowded from opening until closing time. Quantities are limited—you had better be here early in the morning if you would have first selection.

Where Some of Edmonton's Citizens Are Spending The Holidays

View of Cooking Lake, Showing the Wide Expanse of Water.

Summering at Gull Lake

Gull Lake, the oldest and most favored of the central Alberta summer resorts, is growing rapidly in popularity. In the last two months that even the old-timers frequently are astonished. Five or six years ago there were very few campers along the shore of the lake, comprising the Aspen Beach, West Beach, and Europa Resort, but now there are so many that it is difficult for the most part, are strung along the four or five miles of treed-lined sand beach. Two hundred cottages in all, most of them erected this season, and the population of the resort at the present time is estimated at 2,000.

Edmonton people were among the first to evince faith in Gull Lake as a summering place by erecting their building estates. E. C. Emery, of the law firm of Emery, Newell, Ford, Balfour & Mount; T. F. Fisher, secretary of the firm of Fisher, Pender & A. E. May, and others, have turned the lake with their families every year since 1907. Mr. George Stuart, of Calgary, was among the first to build a permanent home at the lake end of the lake for summer song today, including cutouts, they are worth all the way to two thousand dollars, and very few have had even an alibi.

New Hotel Opened

For a long time past, Gull Lake has been the playground for the transient trade, or the week-end visitor, who had no liking for camping and leaving the horrors of the mosquito, was the rule. The White House Hotel was erected, and entered for the traveling public to a certain extent, but now up-to-date in every respect, has been erected by a syndicate of Edmonton people, the company consisting of A. C. Farmarne and P. Gallagher. It was opened for the first time on Sunday, the executives holding delightfully a series of social appointments and comfortable entertainments. It is known as the Lakeside Hotel. There are 100 rooms, all of them overlooking the lake; a commodious restaurant, in which a day was held for the benefit of the Edmonton people on Saturday night, parties for both ladies and gentlemen, and while ladies had hot tubs, and men, down below. The manager is Mr. Kline, formerly of Edmonton, who has had wide experience in hotels of this nature, a winterer at the lake, and water into the hotel. Next year it is proposed to double the capacity of the hotel, and, as the number of visitors already this year, the extensions will more than required. The whole of the hotel is lighted by gas.

The east shore of the lake is about nine miles from Lacombe, and ares-

to campers is that it is absolutely entire for children. An adult may walk out for a hundred yards with every confidence that he will be safely allowed to wander out for half that distance. A delightful sandy beach about twenty feet wide, with some of the best and children play with safety in the water while at Sora and Wabamun beach the edge of the lake is skirted by a gradually sloping sand bank, which affords a safe place ideal for bathing and boating. In places the lake has high sand banks, and children play with safety beneath the trees, which almost childhood.

Bathing is freely indulged in at all hours of the day, the temperature of the water being so warm as to be comfortable for the most part, a bathhouse being built at an early date.

The View at Twilight. In the late twilight, in the sunlight, with the sailing boat skimming over the surface, and the sky above the horizon, the picture, though a little dim, is attractive in appearance, but the scene that is of most interest is the lake itself, setting sun purple the sky at the western end of the lake, and the little fishing boats, the white sailboats, appear more than ever from the campers.

Some of the earliest lake excursionists, however, have been the earl erable ladies, presents an attractive appearance, but the scene that is of most interest is the lake itself, setting sun purple the sky at the western end of the lake, and the little fishing boats, the white sailboats, appear more than ever from the campers.

Bank between the two places for \$12.50 a head for the single trip. If there are enough "heads" to make a respectable train, the price will be reduced. The money was expended by the provincial government last year, is none too good as present, there being several bad streaks, but what makes the trip in half an hour.

An application to the provincial government for a better system of the traffic between the two places, and teams along the sands, frequently induced me to present, will be prohibitive.

To Hold on Eclipse.

Ottawa, July 7.—Actions received here in effect that Hon. Arthur Meighen, collector general, is likely to be returned by acclamation at the next election, and that the by-election occurs on the 19th inst. The by-elections in South Bruce, South Lambton and Bruce are to be held on the 1st, 2nd, 3rd and 4th instants and possibly not until the evening of the session.

IN THE POLICE COURT.

Lewis Riso, charged with the theft of \$150, was discharged at the police court on the charge or being vs unlawful possession of blackjack, Silver Syrup and other articles, value \$100 and costs.

The man stated in evidence that he had bought the blackjack from a man in the city. The magistrate remarked that he strongly disapproved of firms selling such weapons.

VICTORY OVER THE GRAVE?

Pastor Meir Sturzoon, one of Alberta's most gifted preachers, is to lead services at the new Auditorium, near the brow of the hill on Second street, on Sunday morning.

The meeting is under the management of the I. D. S. A., and like the other of the series, is free.

Interest has been manifested in these addresses, which are being held in the U.S. and Canada.

Pastor Sturzoon is famed as a preacher of the gospel message.

He is the author of a number of books on the subject.

The church of the Greater Edmonton Gun Club were at Calgary,

taking part in the shooting competition.

A shooting contest was held on Saturday afternoon on the South Saskatchewan River.

A few of the scores were: Mr. D. M. Gandy, 13; Mr. H. R. Stewart, 17; Mr. J. McNeill, 16;

Mr. W. McAlfee, 15.

CONVICTS' CLOTHES FOUND.

The clothes of John McKillop, one of the escaped convicts, were found yesterday in the bush on Twenty-first Street.

The clothes have been returned to the penitentiary in readiness for McKillop.

An additional set had remained

from earlier markings of winter wheat.

The clothe was nervous with

the weather, so the 1 cent lower

was not lower at 89 3-3 to 89 3-2.

CHICAGO GRAIN MARKETS.

By Bulletin Lined Wire.

Chicago, July 7.—Wheat prices ranged under the weight of heavy marketing and a large supply. There were no close at a decline of 3-4 to 1-8 net.

Purchasing of new wheat to service demands in amount any previous day notwithstanding the reduced advances of 1-2 cent to a great many offers.

There was a slight improvement in the wheat crop region, improving the outlook for a more liberal yield.

Encouragement for the market came from the opening of the and the Liverpool cable early mentioned from the Italian developments and the recent purchases of grain in France. The influence of this news quickly wore off but the market reacted and near the close of business 400,000 bushels had been made here. Severe clearances of wheat and flour imports continued, and the market's receipts of wheat for three days were 1,750,000 bushels, against 230,000 a year ago.

Chicago, July 7.—Excellent rains recently had a beneficial effect today on wheat, but the market was not much affected. It was also an influence against the bulls. At first, however, there was a slight advance on account of stronger cables. The opening ranged from a shade lower to 1-4 to 1 cent above the previous day's closing.

From a shade lower to 1-2 to 1-4 cent above the previous day's closing.

In the market, only a scattered sort caused the market to decline. September started 1-8 cent lower at 42-2 and ranged to 42-2.

BIRDS LOST TWO GAMES TO MOOSE JAW

Concannon Was Driven from the Mound but Northrup Saved the Game

By Bulletin Leased Wire. — Moose Jaw, July 7.—The birds dropped two games to the locusts here today by the scores of 10-4 and 5-2. The afternoon game was a very "juvenile" sort of an exhibition, with the exception of ex-N. L. U. players to come west and New Westminster and possibly Vancouver, Moose Jaw's new pitchers, off the mound in five and two-thirds minutes, were not up to the task. The rescue and the first thing they did was to get Dudley to hit into a double play. They did not allow the birds a hit while the pitchers, however, who touched up for twelve safeties, by Weeds' heavy hitting brigade.

The second game was well exhibition, but was marred by the striking of the Edmonton players, who go in the ranks of the fans. It took two hours and 15 minutes, and the first and a half innings, which delay was caused by the everlasting rain, while the birds were still on the mound. With the exception of two players in the second game, and neither of whom had been scoring, McDonald looked like a real amateur and did not work well. However, he did not let the birds get away, yet forgotten that forfeited game, a hit, and one of the lauging the last few moments, the game was anything but promising. The birds were especially offensive and throughout the entire time of the evening game he kept up his attack, and the umpire which would have given him suspension in almost any other league. However, if the birds have only one catcher, McDonald let them have only one.

Concannon, in his first ball, all along the visitors out in six, while the visitors out in two, since Clayton was easy for the home team. Hagedorn started with his brilliant all-round game.
